

## Maintenance and Repair of Tank Wagons

LOKO TRANS Slovakia specializes in the maintenance and repair of tank freight wagons used for transporting mineral oils and their derivatives. Thanks to modern technologies, a skilled team, and certified processes, we ensure the highest quality, safety, and reliability of your wagons.

- Repairs and restoration of inscriptions on tank wagons.
- Provision of spare parts and materials necessary for repairs.
- Periodic inspections and pressure tests in compliance with applicable regulations.

**Our facility is equipped with modern technologies to ensure high quality and efficiency in repairs.**

#### Control Software

- Monitoring of current data
- Status display using light signals
- Adjustment of the volume of transferred media
- Remote two-hand control with fall protection

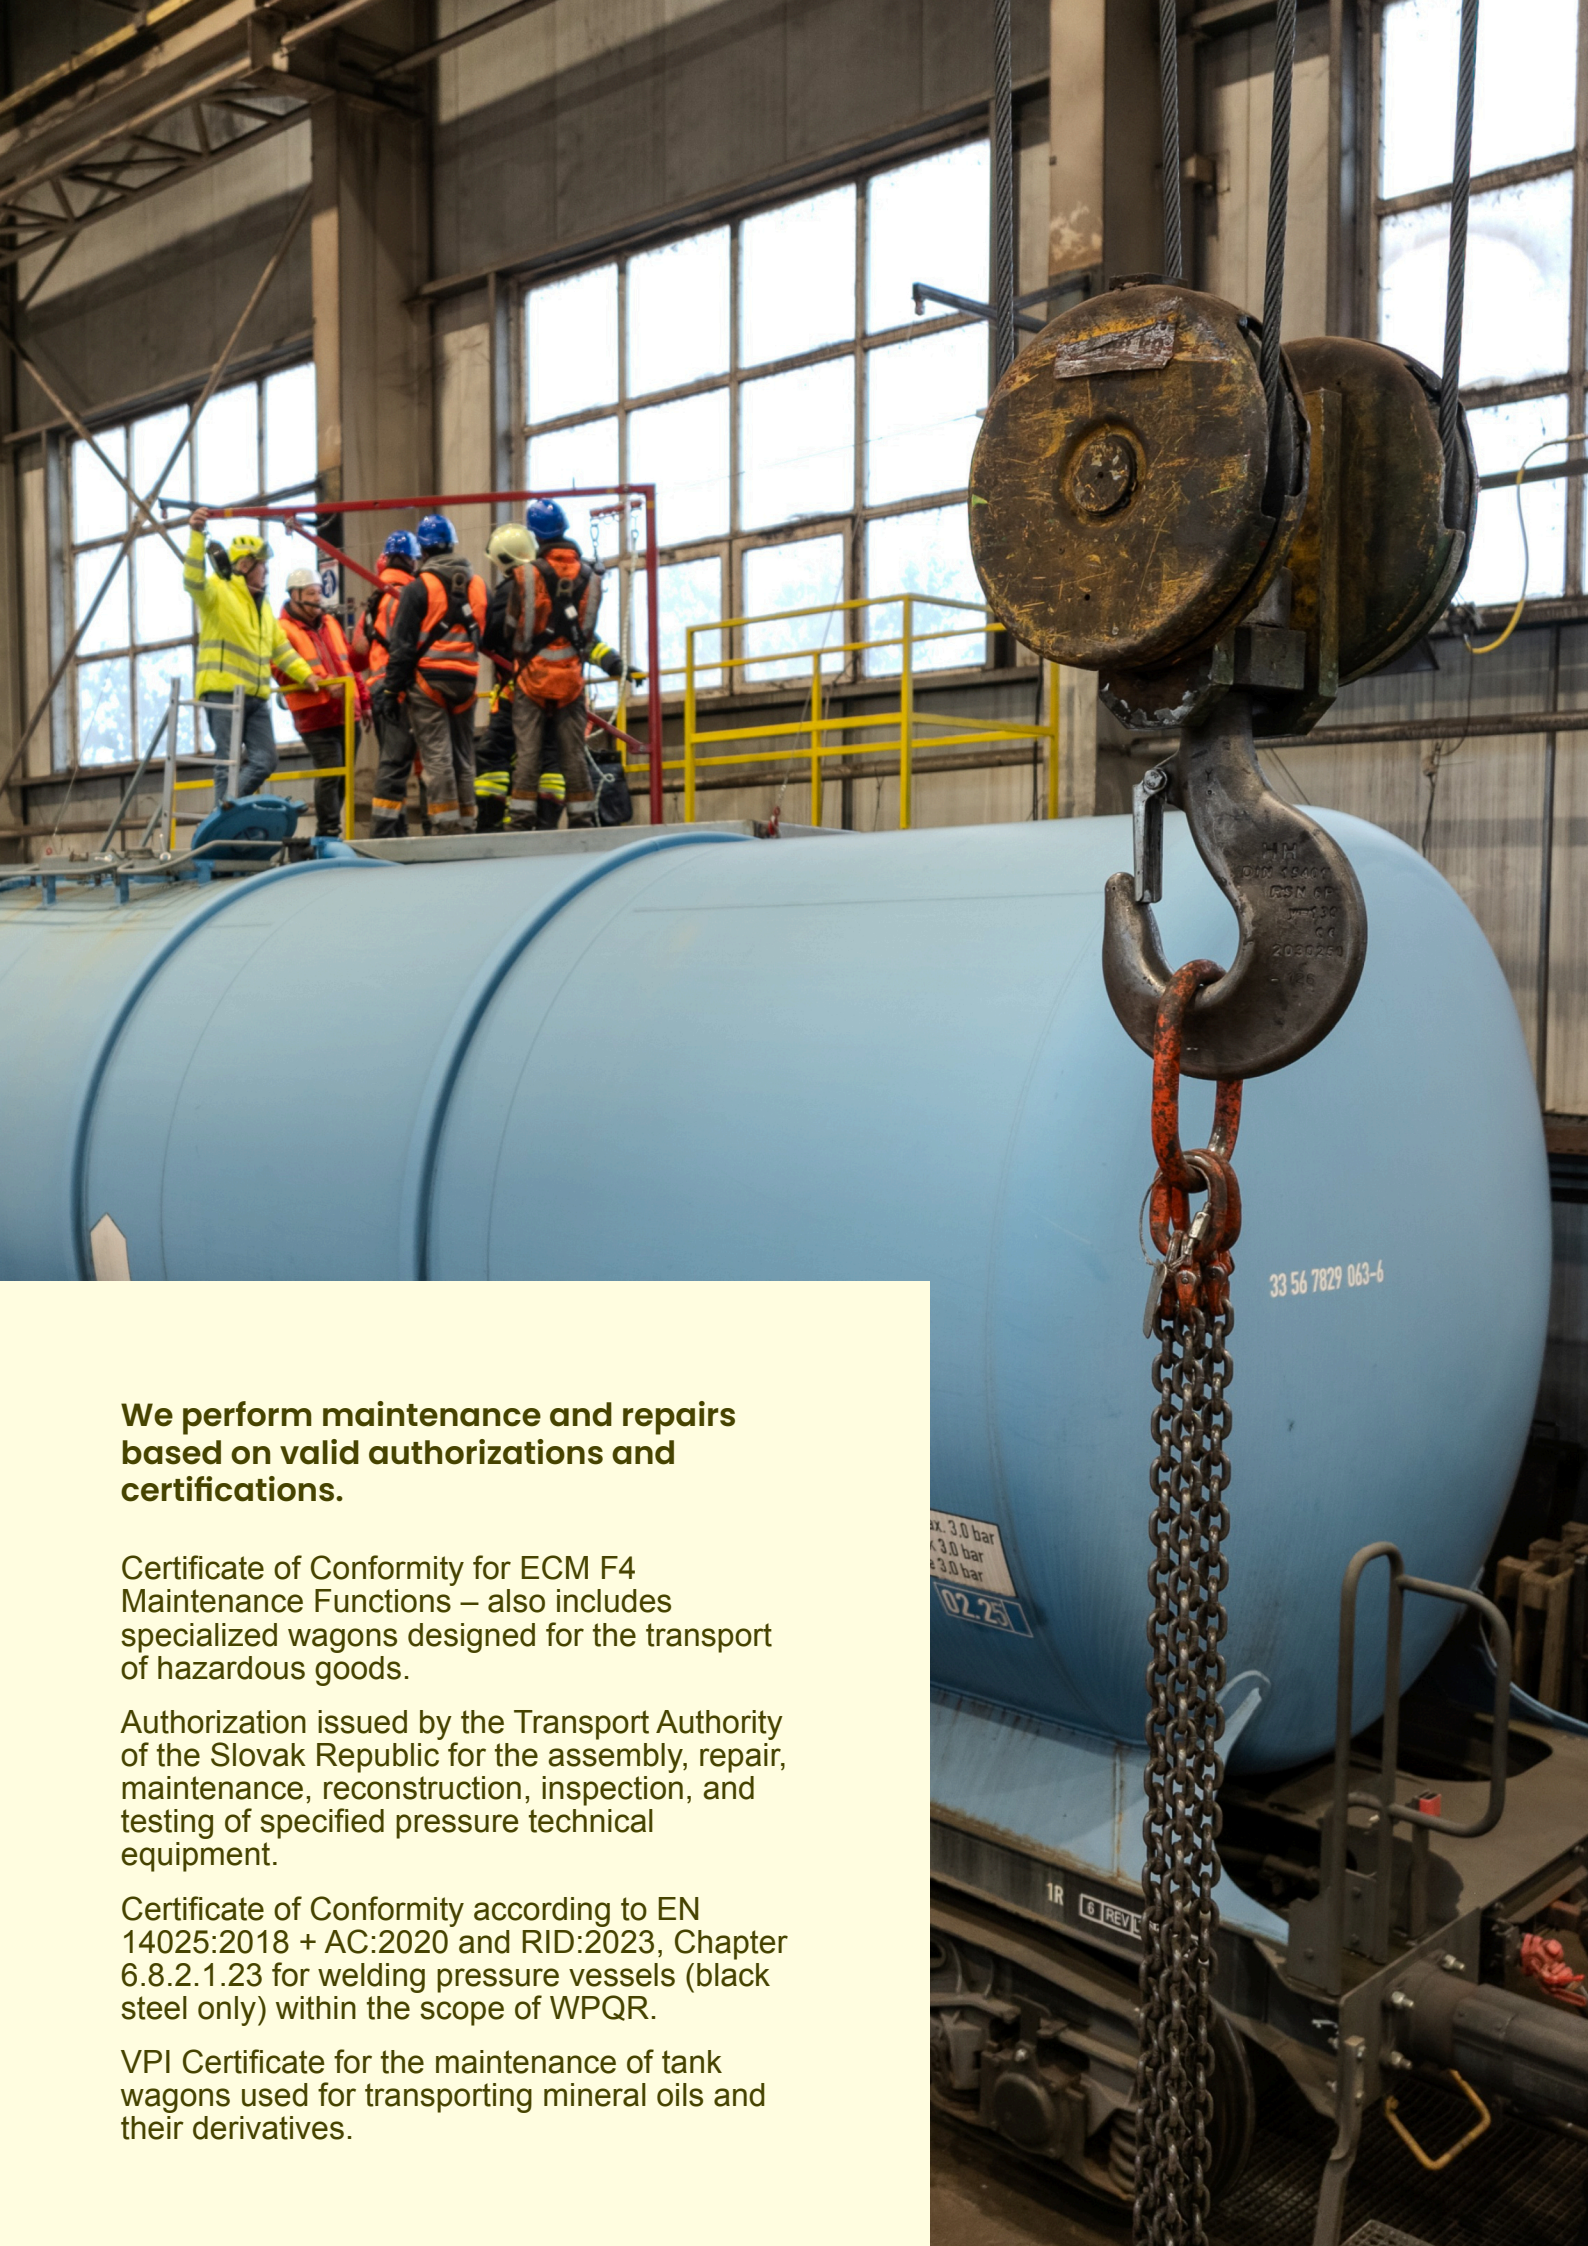

Transfer Unit with a capacity of 110 m<sup>3</sup>/h and multi-level protection

The current volume of the testing medium is 95 m<sup>3</sup>, with plans to expand to 200 m<sup>3</sup> to increase repair capacity.

#### Vacuum-Pressure Testing Station

Equipped with a control panel for measuring vacuum and pressure values before and after the repair of fittings and valves. The system provides automatic evaluation and generates electronic reports.

Compressed air source with a maximum pressure of 7 bar for performing leak tests.

**We perform maintenance and repairs based on valid authorizations and certifications.**

Certificate of Conformity for ECM F4 Maintenance Functions – also includes specialized wagons designed for the transport of hazardous goods.

Authorization issued by the Transport Authority of the Slovak Republic for the assembly, repair, maintenance, reconstruction, inspection, and testing of specified pressure technical equipment.

Certificate of Conformity according to EN 14025:2018 + AC:2020 and RID:2023, Chapter 6.8.2.1.23 for welding pressure vessels (black steel only) within the scope of WPQR.

VPI Certificate for the maintenance of tank wagons used for transporting mineral oils and their derivatives.
